Sultan Education Foundation
Sultan, Washington 98294

To Whom It May Concern:

I am Stephanie Brady, the chemistry teacher at Sultan High School. I have 24 years teaching experience and a Master's Degree. Over my 24 years I taught at six different schools in three different states. These schools ranged from 30 kids per graduating class up to 1,200 students. In the span of my 24 years, I have shepherded about 2,880 students in total.

I am writing on behalf of Jackaline Quevedo. She is one of the best students I have ever taught, having won the Certificate of Excellence in Chemistry. The highest compliment I can give a student is that I do not have to worry about them. Jackie never misses school, save her trips with HOSA state or national championships, yet upon her return to chemistry class, she could catch up seemingly without help. This ability is very rare in so difficult a class. Jackie's goal is to attend Washington State University for nursing. With her gifts for Chemistry and HOSA, I have no doubt she will achieve her goal.

Her integrity and maturity as a person is advanced compared to the average Sultan student as well. I agreed to have Jackie as a Teacher's Aide for Chemistry due to my trust in her ability to aid the instruction of this year's students.

Jackie has set her mind to higher learning and making this world a better place. She is also the first person in her family to attend university. The scholarship's money will be put to good use.

In short, I give my highest recommendation for Jackaline Quevedo. She will make the Sultan Education Foundation proud!

Sincerely,
Stephanie Brady, M.Ed.
